

What is included in Adoption Fees...

- Spay or Neuter
- Combo Test
 - (mom if available and appropriate, or individually if not – we don't mix blood to save money on tests, and we NEVER just test part of a litter)
- Microchip
 - our software system also registers this chip to you)
- Age Appropriate Vaccines
 - FVRCP, FeLV, Rabies + boosters as appropriate
- Deworming
 - Fecal Testing if needed – note that we do basic deworming treatments and do recommend that you have a fecal test done at the first vet visit
- Flea/Ear Mite Treatments as needed
- Mom is spayed/vaccinated (even if she is released as a TNR to stop the cycle) – we also attempt to TNR in areas where there are lots of kittens being found
